

OmniChat

Your AI companion for enterprise data analytics

Where natural language turns complex data into
actionable insights

OCTOPUS
DIGITAL

AI assistants are powerful, but they **don't understand your company's data**

Public models put your business at **risk of data exposure**

You get generic answers instead of tailored, business-specific insights

Knowledge remains scattered across systems and documents

Reports and dashboards **take too long to generate**

Technical expertise requiring specialized knowledge **creating barriers to use**

- **Employees lose ~1.8 hours/day** (or **9.3 hours/week**) just searching for and gathering information (*[McKinsey & Company](#)*)
- **Knowledge workers spend ~2.5 hours/day** (nearly **30%** of their **time**) looking for data (*[IDC](#)*)

That's like 20%
of your workforce
being unproductive

From queries to insights

Natural insight generation: Delivers business-specific insights through natural language prompts

Seamless connectivity: Connects effortlessly to all your business data sources

Automated cleansing: Prepares and standardizes data automatically for accurate analysis

Continuous learning: Adapts to your business language and improves with every interaction

Private by design: Processes only metadata so raw data never leaves your environment

Ad-hoc dashboarding: Creates and saves visual dashboards & reports

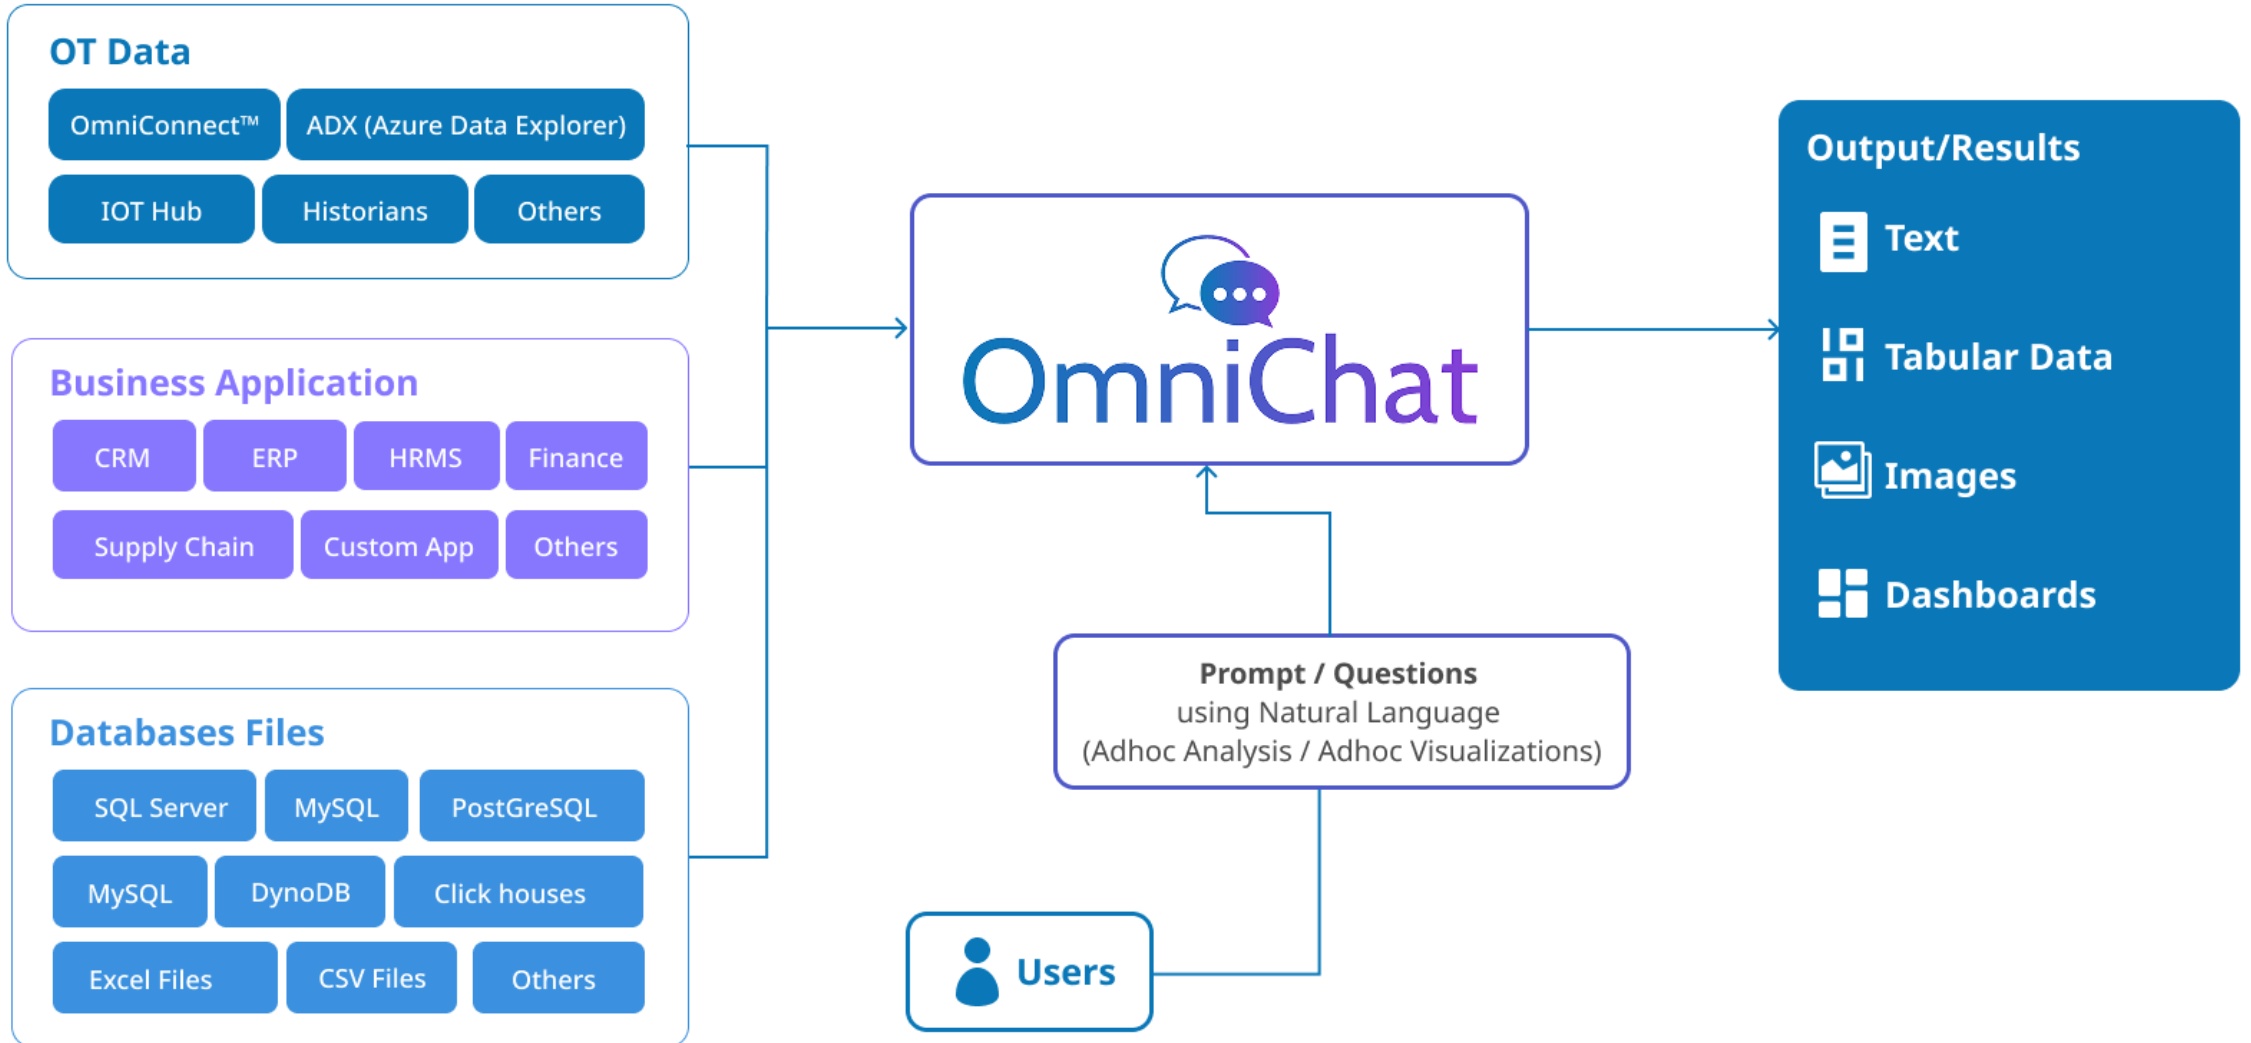

Conversational interface: Uses familiar AI chat for instant and intuitive interactions with no learning curve

About OmniChat

A game-changing GenAI solution that effortlessly derives insights from your data with zero data leakage. Using natural language, you can ask questions and get instant insights from complex datasets – no technical expertise is required.

OmniChat Functional Architecture

Security and compliance

- Your data never leaves your servers or private cloud
- The AI model does not store any confidential information
- Role-based access control ensures the right people see the right data
- Designed to align with industry standards

Some of the use-cases

Sales:

Map field visits and sales numbers by location

Customer support:

Instantly access policy and product information

Operations:

Monitor live process performance through real-time dashboards

Compliance:

Retrieve regulatory requirements in seconds

Executive insights:

Display instant KPI boards during meetings

90%
less time
searching for data

Faster
decision-making
from days to hours

Higher
adoption
familiar interface,
powerful insights

Visual
clarity
leaders see and
understand data instantly

Let's schedule your pilot and show you your data like you've never seen before!

Support and Customer Care

Dedicated Support Portal:

Each client receives a personalized Jira Support Portal for streamlined assistance.

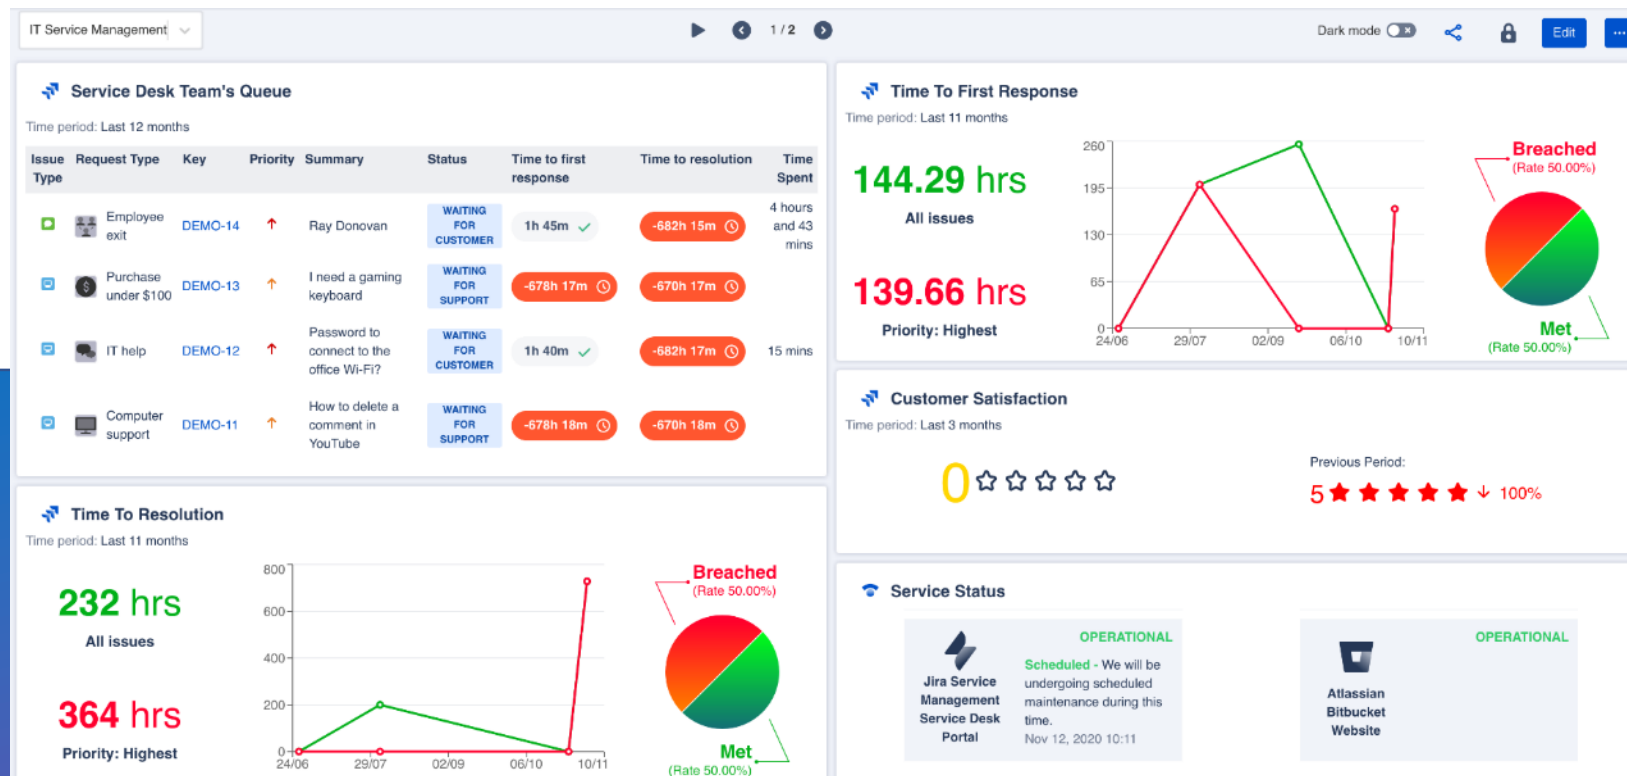

Client-Centric Approach:

Your success is our priority; we are committed to providing the highest level of support.

Seamless Experience:

Our goal is to ensure your experience with OmniConnect™ is smooth and successful.

Accessible Assistance: We are always just a click or call away to address any questions, technical issues, or guidance you may need.

Thank you

Additional slides

Why us

- Deep **enterprise AI integration** expertise
- Built on **trusted LLM infrastructure**
- **Flexible to your workflows** & security needs
- **End-to-end delivery** from design to rollout

How it works

Why it matters

- Every organization's data is unique
- AI learns your terms, abbreviations, and process references

Our approach

Phase 1:

Proactive training

Onboarding includes feeding metadata, key terms, documents, and business rules

Phase 2:

Adoption phase

Model improves as users interact and give feedback

Phase 3:

Steady state

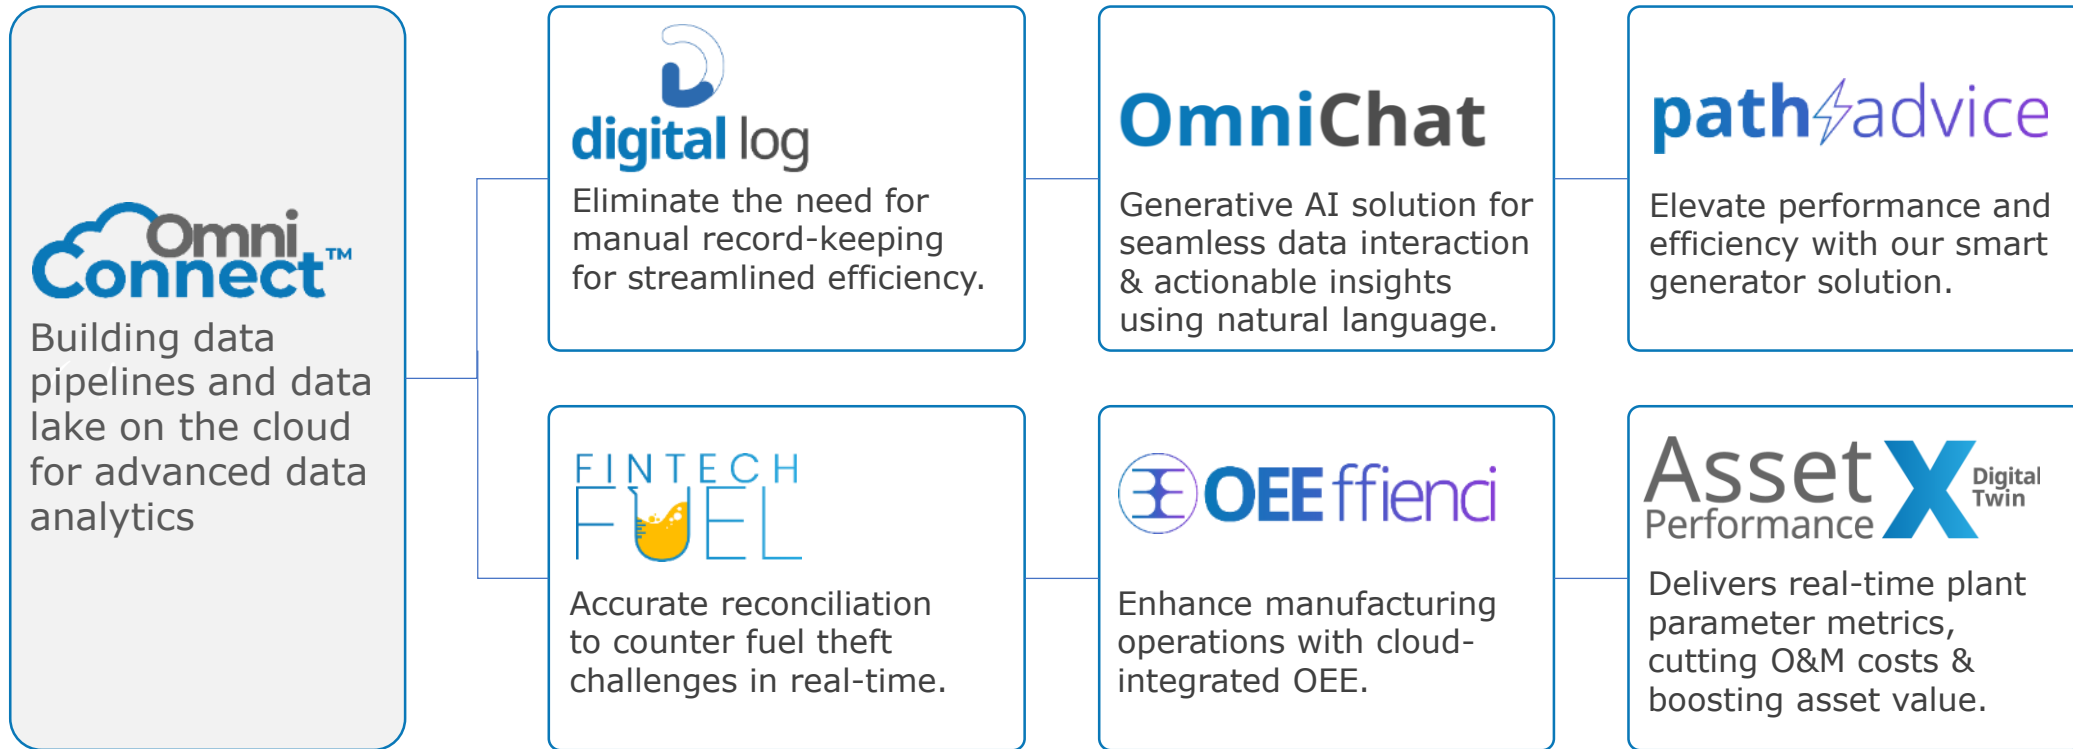

Ongoing training only when new systems or datasets are added

Built-in feedback loop

- Users can "dislike" an answer
- Feedback goes to a designated trainer (client or Octopus Digital)
- Corrections are used to continuously improve model accuracy
